SUPRIYA N

B.E. Biomedical Engineering | Dr. N.G.P Institute of Technology | India

ACADEMIC BACKGROUND

Degree	Field of Study	Institution	Country	Date / Performance
B.E.	Biomedical Engineering	Dr. N.G.P Institute of Technology	India	2024 – Present CGPA: 7.87
Higher Secondary	Physics, Chemistry and Mathematics	Vikas Vidyalaya Matriculation Higher Secondary School	India	Percentage: 86.2%

ACADEMIC, RESEARCH AND INDUSTRIAL EXPERIENCE

Position	Organization	Department / Role	Period
Sports Representative and Captain	Dr. N.G.P Institute of Technology	Captain of the college sports team. Organise sports events and keep students and faculty in touch.	2025 – Present
Member	Toastmasters Club, Dr. N.G.P Institute of Technology	Attend club sessions to get better at public speaking and leading a team.	2024 – Present
Internship	KMCH Hospital	Real time experience for an Biomedical engineer	6 days
Internship	Atheenapandian Pvt. Ltd.	Industrial intern. Saw how production, quality checks and safety rules work in a plant.	15 days

DESCRIPTION OF ACTIVITIES AT THE ACADEMIC INSTITUTIONS

1. Paper presentation: Core Engineers category, SREC UTSAVA'26, Sri Ramakrishna Engineering College (30–31 January 2026).

2. Project Expo: Core Engineers category, SREC UTSAVA'26, Sri Ramakrishna Engineering College (30–31 January 2026).

3. Online courses: IIT Bombay Spoken Tutorial exams in eSim (85.71%, October 2026), Blender (72.50%, January 2026) and HTML (70.00%, February 2026).

4. NPTEL courses: Biophotonics from IIT Kharagpur (Jan–Apr 2026), 90%, Elite; Transport Phenomena in Biological Systems from IIT Madras (Jul–Oct 2026), 54%.

5. Industrial visit: went to T-Hub to attend a conference, at saag medicare (30th march 2026).

6. Entrance exam: wrote JEE and scored 54.

7. Projects: "Bridging Silence", a sign language translator that works live through a webcam, and "Tricol Bioregen Band", a herbal wound dressing.

8. Extracurricular: sports captain and Toastmasters Club member at Dr. N.G.P Institute of Technology.

PROJECT EXPERIENCE

A REAL-TIME SIGN LANGUAGE TRANSLATION WITH WEBCAM

Hand gestures shown to a webcam are read with OpenCV, and Google Gemini AI turns them into spoken sentences. Built with Python and Flask so that people with hearing or speech difficulties can talk to others more easily.

TRICOL BIOREGEN BAND – NATURE BOOSTED WOUND HEALING USING TRIDAX PROCUMBENS WITH COLLAGEN

A wound dressing made by mixing a collagen hydrogel with extract of the herb Tridax procumbens. The goal is faster healing and protection from infection, at a low cost and without harming the environment.

HOSPITAL INFECTION CONTROL ASSISTANT

A simple website that keeps hospital infection control steps and protocols in one place, so they are easy to look up. View project: hospital-infection-control-assistant

AREAS OF EXPERTISE

Biomedical Engineering; Biomedical Instrumentation; Medical Device Basics; Computer Vision; AI in Healthcare; Programming (Python, C, HTML); OpenCV; Flask; Blender; eSim; Problem Solving; Teamwork; Communication; Leadership; Time Management; Languages (Tamil, English).
